

LIGHT BREEZE

This lamp captures a warm summer breeze that blows through your apartment and makes your curtains swing like on a windy, warm summer night. Its an eternal summer wind and the beauty of its motion. Backlit with a light it's a simulation of a relaxing evening, the end of a hot day, that finally cools down.

DIMENSIONS

Axonometry 1.0 Light Breeze

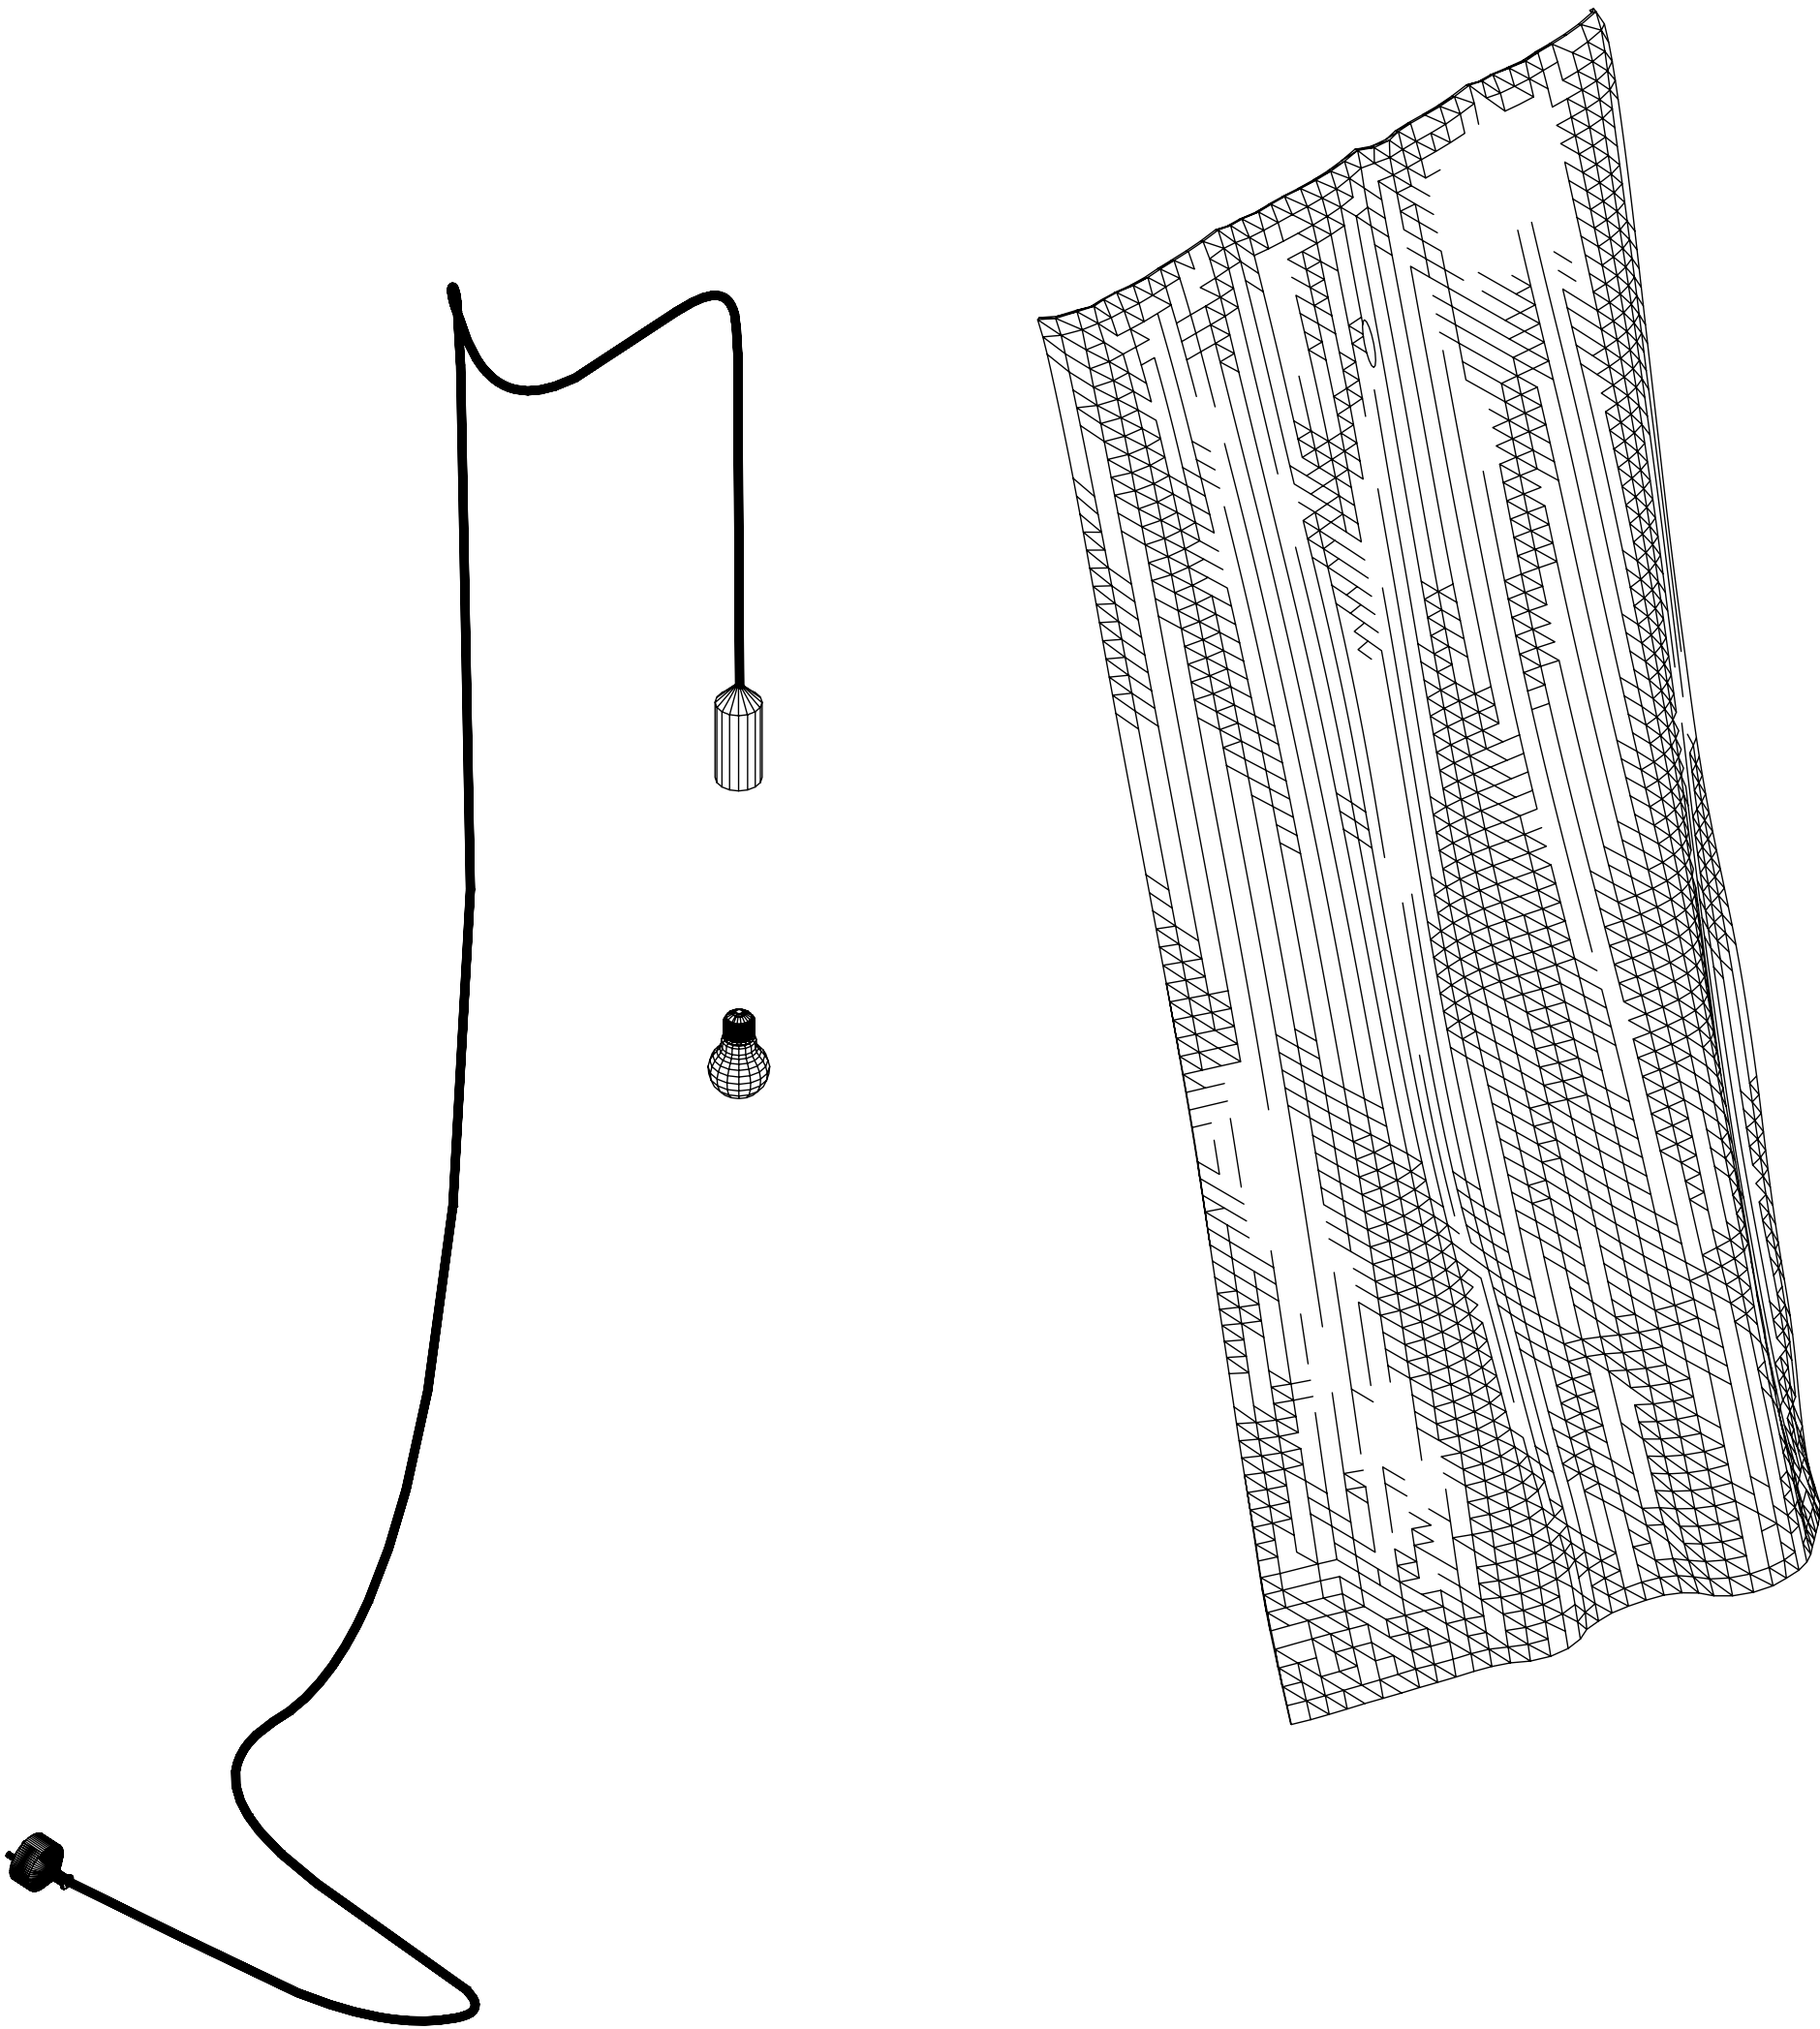

Views Light Breeze

The Light Breeze lamp consists out of 3 elements: a cable to plug in the light source, a standard light bulb and a fibreglass lampshade. The first two are Ready-Mades, the third one needs to be produced. The lampshade is made out of fibreglass and epoxy resin, that is applied by laminating pieces of fibreglass on top of each other. Therefore a 3D model for the negative form is attached to the download.package.

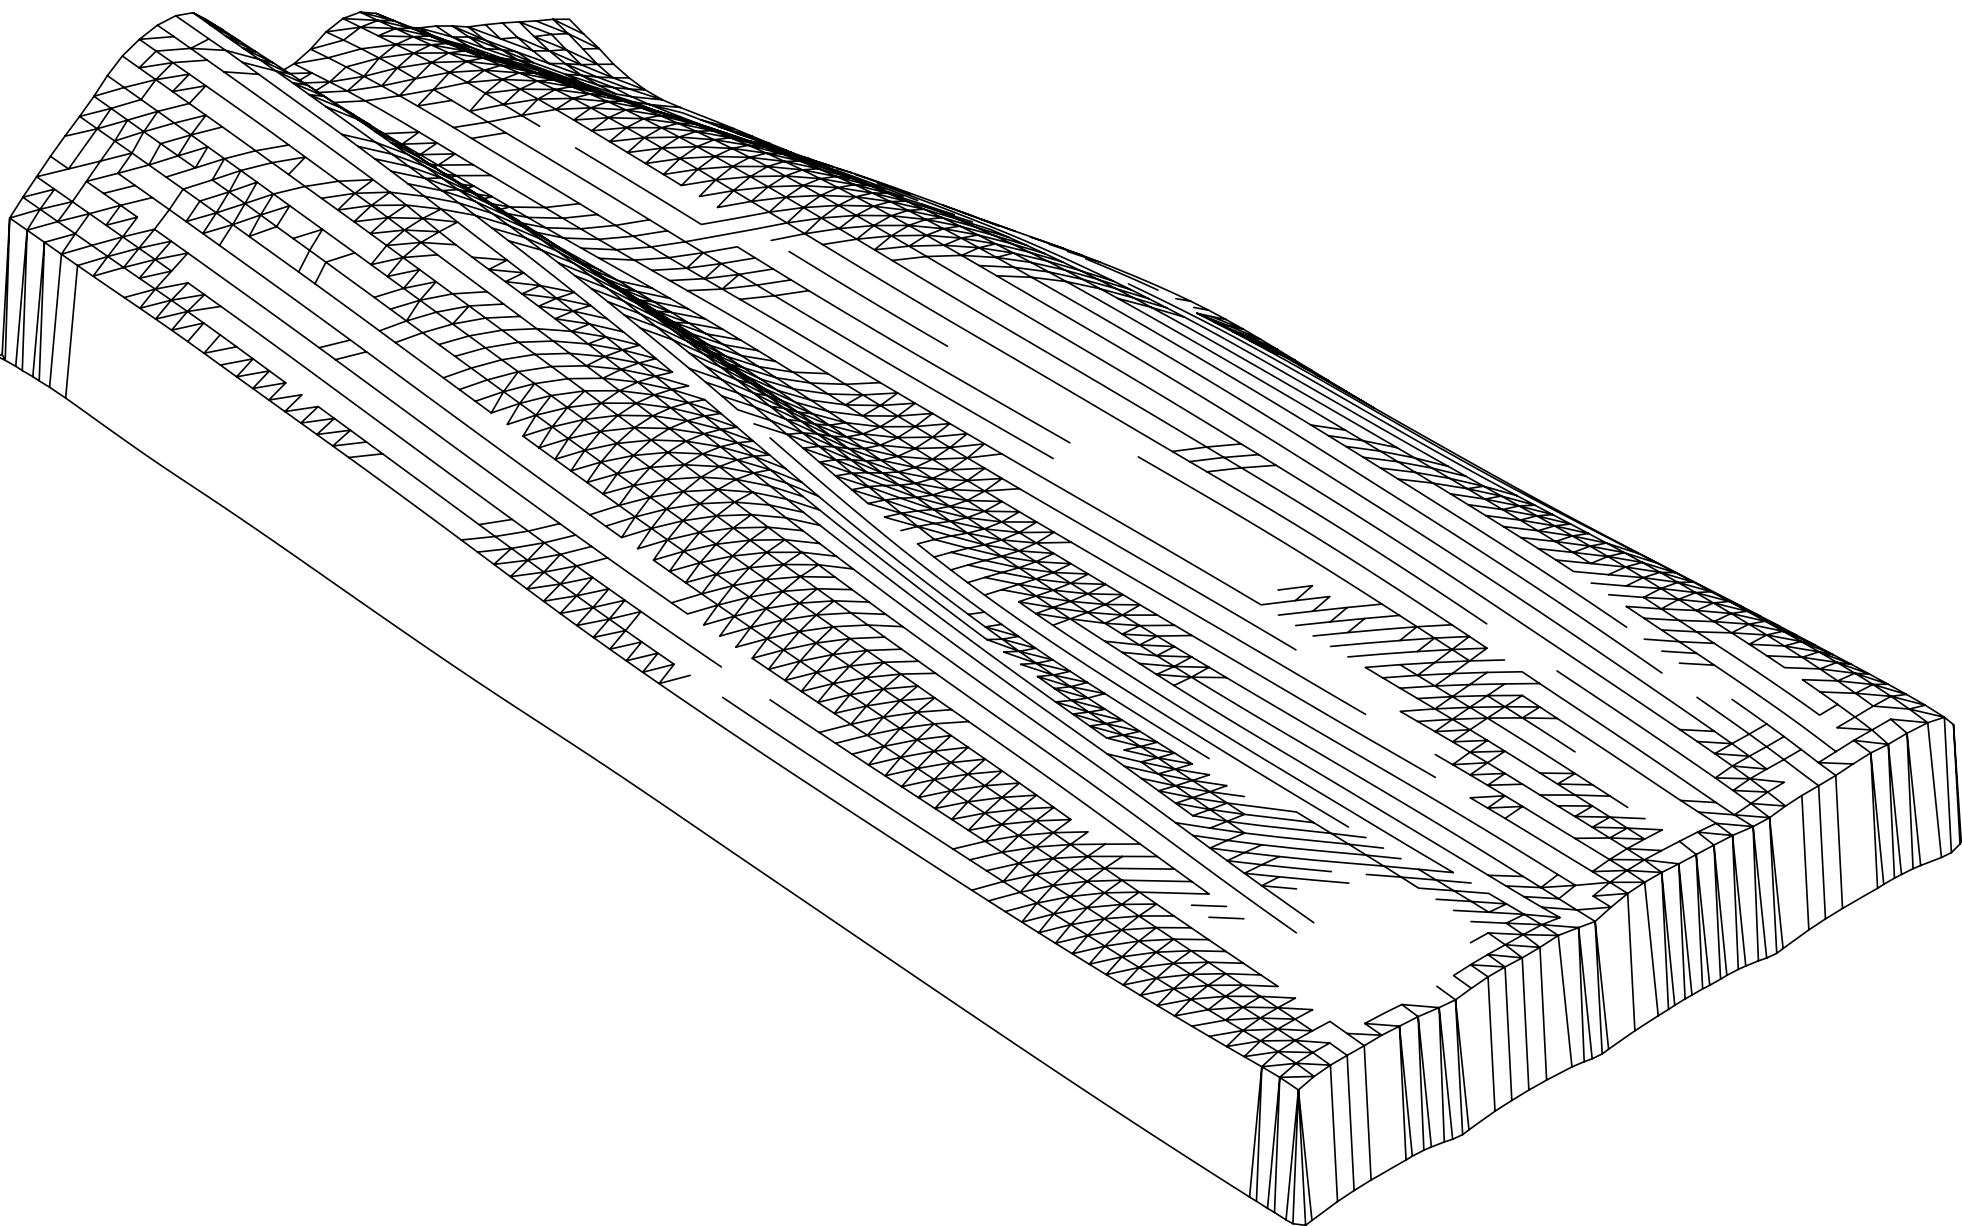

Material:

- 1 pcs.: 2,5m lamp suspension
- 1 pcs.: light bulb
- fibreglass
- Epoxy resin transparent 1,5 kg
- wood for the negativ form
